Data Science and AI undergraduate with hands-on research and enterprise experience delivering machine learning solutions. First-author publications at IEEE ICT4M 2025, with applied work spanning graph neural networks, predictive modeling, and cloud-native ML pipelines. Proficient across the full data science stack (Python, PyTorch, SQL, PySpark, Power BI, and Google Cloud Platform). Passionate about turning complex data into clear, actionable decisions.

EXPERIENCE

AI Intern STDCx, Teraju AI Internship Programme | 2026 - Present

- Built ClearDesk, a browser-based workplace-protection system featuring SHA-256-sealed audit trails, AI-powered scope-creep detection, and append-only incident logging — deployed as a functioning enterprise tool.
- Engineered a Telegram-integrated attendance automation system synced with Google Sheets, eliminating ~3 hours/week of manual tracking across a 20-person cohort.
- Served as technical liaison across three concurrent AI initiatives (attendance automation, document intelligence, model monitoring), translating business requirements into ML task specifications for delivery teams.

Research Assistant, MOSTI-Funded Enterprise AI Project: Forthify Tech (OMIS, IIUM) | 2025

- Built end-to-end NLP pipelines (tokenisation, NER, text classification) using Python and HuggingFace Transformers, achieving 88% classification accuracy on enterprise datasets.
- Reduced model error rate by ~12% through iterative feature engineering, hyperparameter optimisation, and cross-validation (validated via formal precision/recall/F1 benchmarking across model iterations).
- Translated cross-functional stakeholder requirements into AI deployment specifications, authoring system behaviour documentation that anchored engineering handoff.

Personal Assistant / Scheduling Coordinator | 2025

- Managed end-to-end scheduling for a multi-venture founder juggling a startup, full-time studies, tutoring, and community leadership (ICE) simultaneously.
- Eliminated scheduling conflicts across 5 concurrent high-stakes commitments, freeing the founder to focus purely on execution.
- Functioned as the single point of coordination across a genuinely complex, high-velocity personal-professional workload.

Freelance Brand Promoter & Event Crew | 2023 - 2025

- Represented four national brands (GPR, Dutch Lady, Yobick, MATTA) as frontline talent across multiple live activations and campaigns.
- Drove brand visibility and consumer engagement through consistent, high-energy execution across diverse event formats.
- Rapidly adapted to distinct brand identities and client expectations (proving versatility across fast-changing, client-facing environments).

Senior Sales Assistant: AS Watson | 2021

- Consistently exceeded assigned sales KPIs while independently managing concurrent customer service, merchandising, and operational duties.
- Maintained full inventory accuracy through systematic stocktaking, directly supporting loss prevention and stock planning.
- Delivered reliable, high-performance execution in a fast-paced, high-volume retail environment.

EDUCATION

Bachelor In Computer Science (Honours) (Data Science and Artificial Intelligence)
International Islamic University Malaysia (IIUM) | CGPA: 3.40 / 4.00 | Expected 2026

TECHNICAL SKILLS

Languages: Python, SQL, R, Java, HTML, CSS, C

ML & Deep Learning: PyTorch, PyTorch Geometric, GraphSAGE, Scikit-learn, HuggingFace Transformers, NLP, Predictive Modelling, Feature Engineering

Data & Cloud: BigQuery, PySpark, Google Cloud (Vertex AI), Git/GitHub, Streamlit

Analytics & Visualization: Power BI, Looker Studio, EDA, Statistical Analysis

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- Google Cloud Skills Badges: BigQuery, Looker Studio, Vertex AI, Cloud Security
- CompTIA Data+ ce (DAO-001)
- CCNA: Introduction to Networks (Cisco)
- CelcomDigi SiswaPreneur Bootcamp (2023) | Platform Strategy, Zero-Cost Marketing, Online Presence Building, AI-Driven Content Creation
- Celcom Siswapreneur @ Google Bootcamp (2022) | AI in Daily Life, Google Collaboration Tools, Personal Branding, Career Readiness

PUBLICATIONS

IEEE ICT4M 2025 | DOI: 10.1109/ICT4M68001.2025.11363544

Quantitative Imaging Biomarkers for Prognosis Prediction and Treatment Stratification in Lung Cancer Through a Multi-Stage Deep Learning Approach

LEADERSHIP & VOLUNTEER EXPERIENCE

Motion-U Startup Incubation Club

Secretary I / Core Organizing Committee | Motion-U Startup Incubation Club | 2022 – 2025

- Revived a defunct student club from zero, rebuilding membership and leadership from the ground up to restore Motion-U as an active entrepreneurship platform post-COVID.
- Pioneered the inaugural MotionU Award, a competitive FYP-style showcase with real industry judges, creating a new flagship event now part of the club's legacy.
- Led 3 consecutive years as Main Chair of the club almanac while organizing 5+ major initiatives (workshops, hackathon, open day), directly engaging 70+ members and external industry partners.

Event Volunteer, MyHackathon | Cradle Fund & MOSTI

- Supported end-to-end logistics and on-ground operations for MyHackathon, a national-level hackathon co-organized by Cradle Fund and the Ministry of Science, Technology and Innovation (MOSTI).
- Coordinated multiple concurrent operational tasks across the event lifecycle, ensuring smooth execution for participating teams.

Event Support, "Anonymity 101" Cybersecurity Talk | ICE (Information & Cyber Security Enthusiasts)

- Supported the organization of a cybersecurity awareness session covering Tor, VPN, and proxy fundamentals, presented by a recognized underground cybersecurity community (ICE), broadening exposure to applied security and privacy concepts.
